IMPROVE YOUR LIFE NOW!

Who we are, our mission

The Nation of Leaders team comprises representatives of civil society who genuinely care about the future of Belarus.

They are authors of training courses, coaches, and hosts of master classes, experts, public figures, and specialists who help create, manage, and promote educational products.

Our vision is that education is a critical driver of quality changes in Belarusian society, which will enable Belarus to not only overcome the social and political crisis, but also foster its sustainable development in the future.

We create an educational ecosystem, in which Belarusians can develop, change, acquire new competences and support, while enhancing meanings and values inherent in active members of civil society; in which social ties are reinforced, communities are shaped, interaction skills are developed, and a constructive culture of communication is formed. We therefore help individual Belarusians and Belarusian communities to build their capacity and be the ones who influence their environment, contributing to profound changes in civic consciousness and promotion of other citizens and communities.

Furthermore, we strive to contribute to efforts to further adult education in cooperation with other proactive actors.

We started in 2021 and have grown significantly throughout 2022.

Financial sustainability in 2022

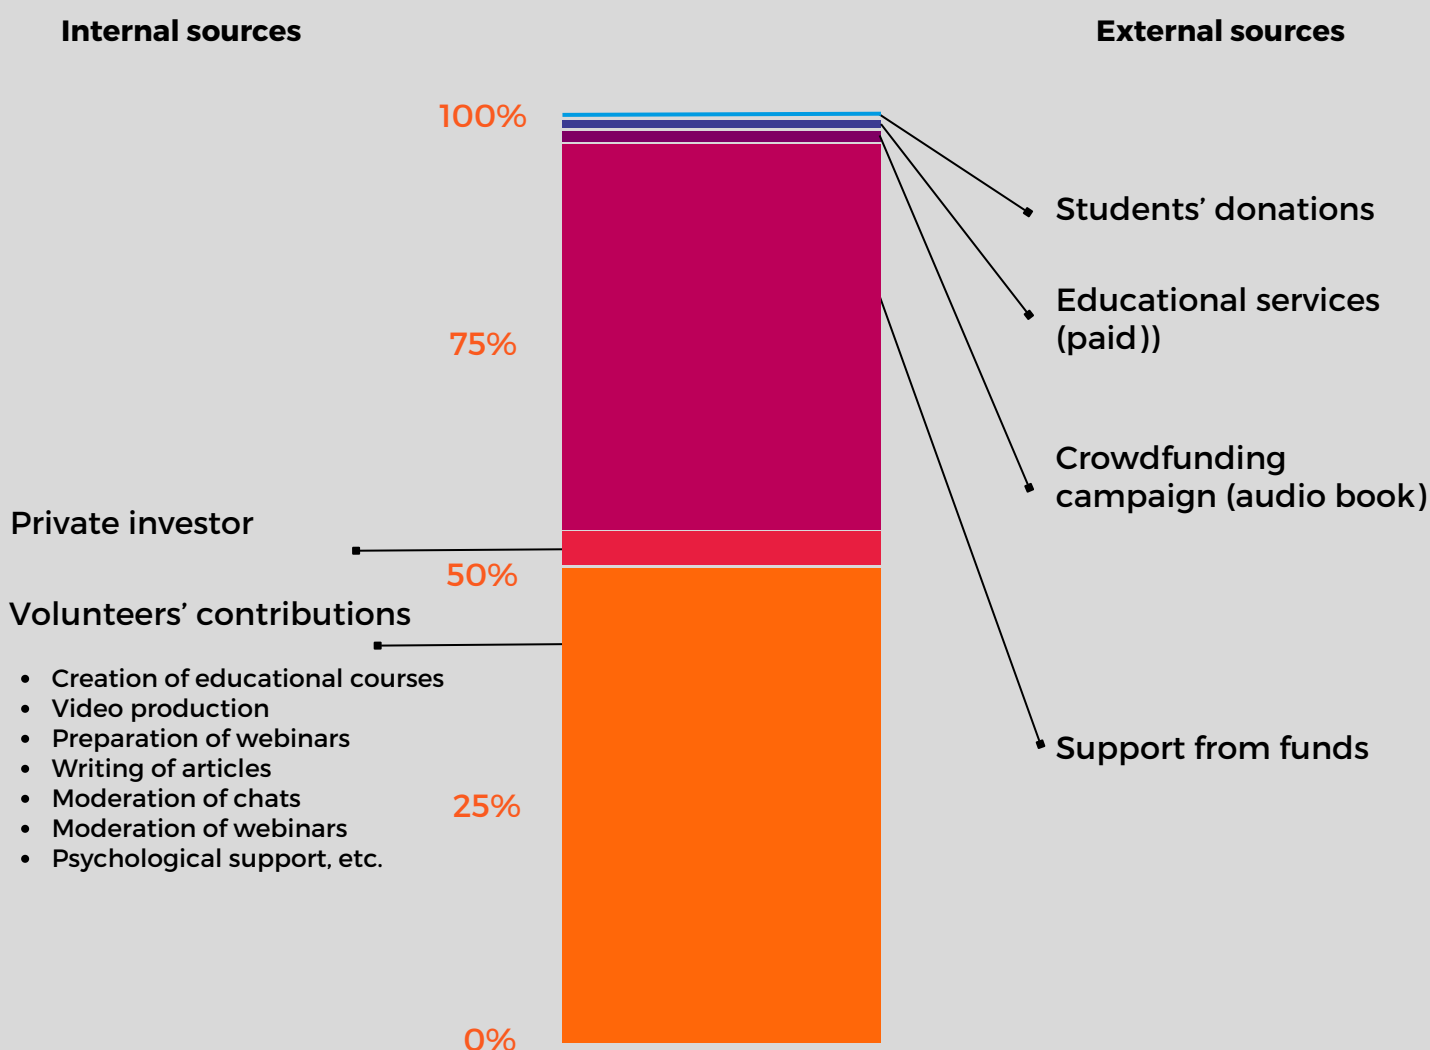

Volunteers who share the same objectives and values make up most of the team.

Volunteers who share the same objectives and values make up most of the team.

Course participants have been grateful for the benefits offered by Nation of Leaders: they have made donations, brought equipment, and several alumni joined our team. This year, coaches and team members have been thanked hundreds of times for their work, help, and support (in post-course surveys, in the chat, in personal messages, and during webinars).

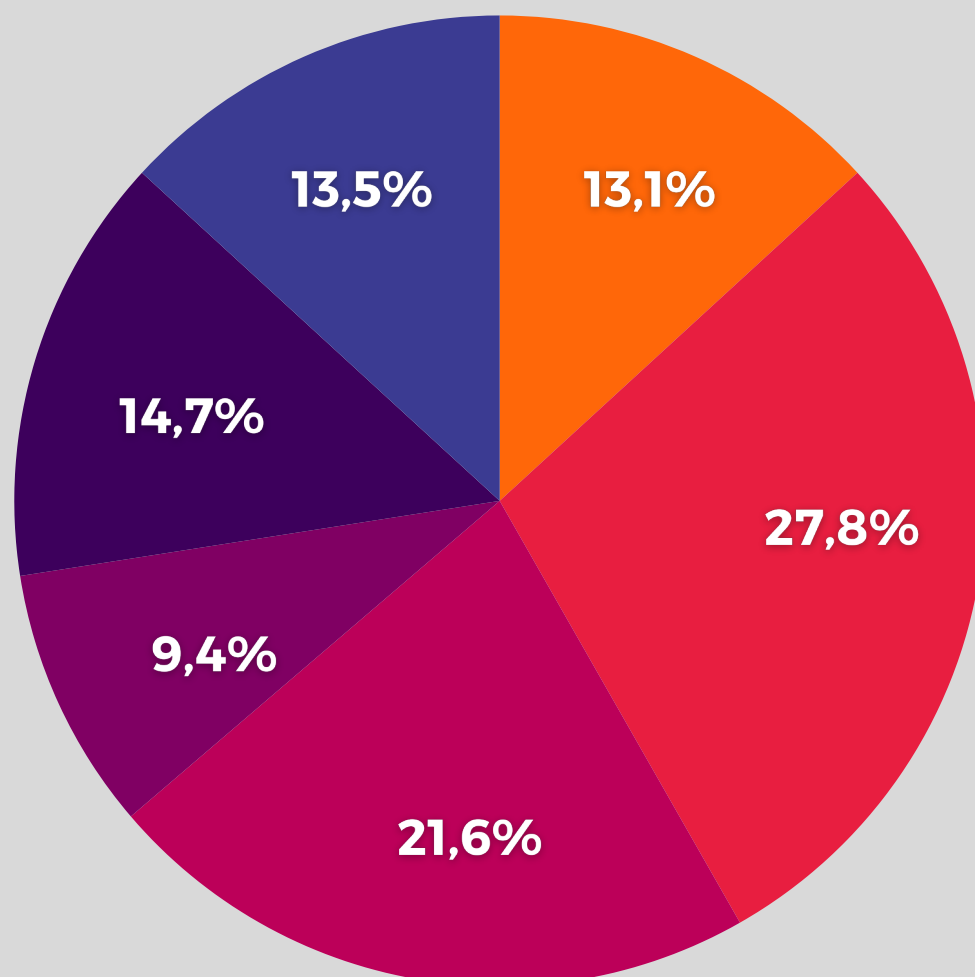

The initiatives and educational capacity of Nation of Leaders have been appreciated by four funds offering support for Belarusian civil society development. Their financial backing has enabled more systemic evolution, contributed to several new educational programmes, and made it possible to involve more people in the training process.
